

Bologna, November 2012

FOURTH INTERNATIONAL RECOGNITION IN A FEW MONTHS FOR FPT CUSTOMERS

During the Eima International Agricultural Show in Bologna, Italy, the New Holland T 4060 F tractor, powered by FPT engines, was awarded “Best of Specialized 2013” by the Tractor of the Year® jury.

This recognition comes after the excellent results obtained in the Nebraska Tractor Test Lab by the Case IH Steiger® tractors, the “International Truck of the Year 2013” awarded to the new Iveco STRALIS Hi-Way and the record conquered on the New York – Bermuda ocean route by FB Design, all thanks to FPT engines.

The “Best of Specialized” award, set up in 1998 by the Italian magazine “Trattori”, is part of the Tractor of the Year® election and awards European innovations in specialized tractors for particular applications, such as orchards and vineyards, where compactness of the machines is fundamental for operators. The jury consists of around 20 European journalists representing the most influential agricultural magazines.

The winning New Holland T 4060 F, a compact tractor for a wide range of applications, especially orchards, is powered by the FPT NEF 45 engine.

This engine, characterized by reduced maintenance and designed for optimal packaging, guarantees top level performance, both in terms of maximum torque (up to 425 Nm) and torque rise (more than 30%). This optimization of the performance/dimension ratio represents a fundamental driver for this kind of application.

The NEF Series, who celebrated last July its one millionth unit, is available in a 4 cylinder 4.5 litre and a 6 cylinder 6.7 litre version, with power between 66 and 220 kW (90 - 299 HP). These engines, the most representative in the FPT line-up for agricultural applications, stand out for their great flexibility, reliability, low fuel consumption and high performance, which make them a reference in their category.

Press Release

FPT INDUSTRIAL

FPT Industrial is a company of FIAT Industrial dedicated to the design, production and sale of powertrains for on/off-road vehicle, marine and power generation applications. The company employs approx. 8,000 persons worldwide, in 10 plants and 6 R&D Centres. The FPT Industrial's sales network consists of 100 dealers and over 1,300 service centres in about 100 countries. A wide range of products (5 engine ranges from 37 up to 640 kW, and transmissions with maximum torque from 300 up to 500 Nm) and a close focus on R&D activities, make FPT Industrial a world leader in industrial powertrains.
