

Canadian Service Entrance Rated ATS

EGSCA200ASE

Service Disconnect and ATS in One!

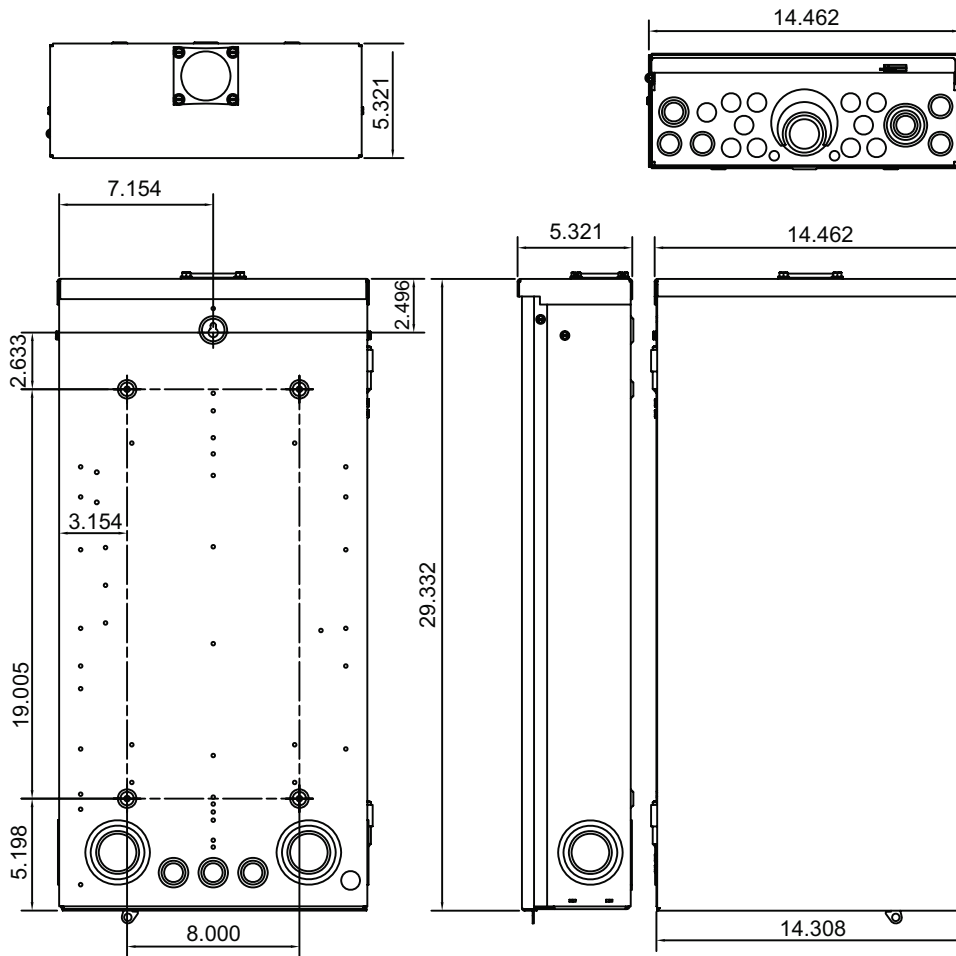

Our Service Entrance (SE) Rated switches combine the SE Disconnect and Automatic Transfer Switch (ATS) in one convenient enclosure. They are available in two styles; Basic (EGSC line) and Advanced (EGSCA line). The basic line relies on the generator to monitor utility and generator voltages and will automatically transfer to the appropriate source of power when signalled from the generator. The Advanced line of switches are compatible with utility sense and engine start type generators, and do not require a transfer signal from the generator. They also feature LED position indicators for source availability, engine start signal and load management* capability!

(* separate current transformers required, qty 1 PN CS200)
